

We are exploring how digital technologies can help people who are partially sighted to blind and hard of hearing to deaf have a better experience when they visit their GP. Would you like to join in?

What we'll be doing at the Workshop

- With a mix of workshops aiming to support anyone who joins us on the day, you'll get to try out some technology with us, and give us your views on how well it works for you
- We'll be sharing lots of ideas about what else you could try
- We'd also love people to share what they are already using, or have experienced previously, in this environment, that helps them.
- We'll be there if you want to share your particular difficulties when visiting your GP

Date: 14th May 2018

Location:

Brian Jackson House, New North Parade, Huddersfield, HD1 5JP

Morning Activities: 9:30am to 1pm

Afternoon Activities: 2pm to 4:45pm
